Three steps to empower your enterprise

To meet explosive growth in demand for bandwidth and functionalities, and ensure cabling, connectivity and networks hold up in an increasingly demanding environment, a digital transformation is needed.

Nexans' three-step approach makes it easier to find a solution, as there's no 'one size fits all' answer.

1) People & devices - data & power for the converged office

When selecting a cabling system, you need to consider the people and devices that need to be supported. Emerging standards are driving increased bandwidth and power over the network - especially with growth of new WiFi technologies. You may need to plan higher spec cabling in the ceiling to support WAP's.

2) Building conditions - the specific issues for your buildings?

Which distances need to be bridged? Are there specific requirements with regard to functionality or uptime? The following all have an impact on the most suitable choice for the network:

- Limited space for cabling
- Distance and reach required
- Harsh conditions – cold / wet / EMI levels
- Fire performance & security needs

3) Network flexibility – managing your digital foundation

How flexible does your network need to be to accommodate probable future requirements?
How do you ensure this is the case?

Planning the right network that can adapt with your changing business needs has a direct impact of the total cost of ownership. Different options may be more appropriate for different requirements:

- Planning redundancy and capacity for planned growth
- Ease of network management & administration
- Consequence of network downtime
- Lowering carbon footprint and energy management

Nexans has a complete range of solutions to help you make the Smart Choices for your specific requirements ...

Nexans smart choices

Nexans' range of practical solutions offers the right performance for every business and environment. These exceed the requirements of all relevant standards, ensuring your network performs better and more reliably. Our expertise and far-reaching involvement in the development of standards means we always find the right solution.

Determining current and future requirements results in faster, more efficient roll-outs, solutions that perform exactly as specified, optimised TCO, enhanced energy efficiency and systems that will remain in business for years to come.

LANmark

Flexible architectures for any environment

- Improved reliability and performance
- More ports, more connections, longer links, cost-effective bandwidth
- Perfect balance of copper and fibre for every application

LANsense

Protecting and optimising performance

- Automated Infrastructure Management with intelligent management hardware and software
- Monitors and controls all connected equipment and manages changes
- Reduce operational costs and improve asset management, utilisation and deployment of new services

LANactive

Fibre To The Office (FTTO): the alternative LAN solution

- Vast savings on time, space and cost
- 'Pay-as-you-grow' concept allows expansion according to needs
- Copper and fibre combined for best performance, scalability and flexibility

datanetworks.info@nexans.com

- Comply with all Category 6 cable standards
- Support Class E applications
- Central cross member maintains geometry and performance
- Tested up to 350MHz

DESCRIPTION

Application

Nexans LANmark-6 cables are the ideal solution for most of today's network requirements in normal office environments. They are manufactured and tested to the latest Category 6 specifications defined in the International and American cable standards and are designed to meet the quality and performance criteria needed to support all applications up to 250 MHz.

- 10baseT Ethernet
- 100baseTX Fast Ethernet
- 1000baseTX Gigabit Ethernet
- 155 MBit ATM
- 622 MBit ATM
- 1.2 Gbit ATM
- Future class E applications

Design

The LANmark-6 U/UTP cables have a central cross element which helps maintaining the stability of the cable geometry and reduces the risk of a reduction in performance when bending the cable.

The cables are available with a Dark Grey PVC or an Orange LSZH sheath. Both versions have flame retardant properties compliant with IEC 60332-1 and are compliant with EuroClass Eca according to EN50575:2014 +A1:2016.

EuroClass Dca and Cca versions are also available.

Performance

Tested to 350 MHz and with guaranteed performance to 250 MHz, Nexans LANmark-6 cables exceed the requirements of the International, European and American cable standards, including ISO/IEC 11801, IEC 61156-5, EN 50173, EN 50288 and TIA/EIA 568-C.2.

Installation

To support the correct set-up of hand held analysers for installation testing, the actual cable NVP value is given in the cable's print legend.

Guarantees

The LANmark-6 cable performance is guaranteed to meet or exceed the requirements of the above mentioned standards.

LANmark-6

- F1/UTP and F2/UTP constructions
- Comply with all Category 6 cable standards
- Support Class E applications
- Central cross member maintains geometry and performance
- Tested up to 350MHz
- Orange LSZH sheath

DESCRIPTION

Application

Nexans LANmark-6 cables are the ideal solution for most of today's network requirements in normal office environments. They are manufactured and tested to the latest Category 6 specifications defined in the International and American cable standards and are designed to meet the quality and performance criteria needed to support all applications up to 250 MHz.

- 10baseT Ethernet
- 100baseTX Fast Ethernet
- 1000baseTX Gigabit Ethernet
- 155 MBit ATM
- 622 MBit ATM
- 1.2 Gbit ATM
- Future class E applications

Design

The LANmark-6 shielded cables have AWG 24 solid copper wires and comply with IEC 60228.

The PE central cross filler helps maintaining the stability of the cable geometry and reduces the risk of a reduction in performance when bending the cable. The cables come standard with an Orange LSZH sheath.

Performance

Tested to 350 MHz and with guaranteed performance to 250 MHz, Nexans LANmark-6 cables exceed the requirements of the International, European and American cable standards, including ISO/IEC 11801, IEC 61156-5, EN 50173, EN 50288 and TIA/EIA 568-C.2.

Installation

To support the correct set-up of hand held analysers for installation testing, the actual cable NVP value is given in the cable's print legend.

Guarantees

The LANmark-6 cable performance is guaranteed to meet or exceed the requirements of the above mentioned standards.

- Ideal cable for 10GBase-T application
- Full compliance to latest standards for Category 6A and Class EA
- Guaranteed performance up to 500MHz
- Global or individual pair shielding offering Alien Crosstalk immunity

DESCRIPTION

Application

LANmark-6A cables are the ideal solution for a 10G Ethernet network. The range has been designed specifically to support the higher frequencies required for 10 Gigabit Ethernet, while maintaining full backwards compatibility with today's needs. All LANmark-6A cables are shielded, in order to ensure immunity to Alien Crosstalk and other external interferences.

- 10Base-T Ethernet
- 100Base-TX Fast Ethernet
- 1000Base-TX Gigabit Ethernet
- 10GBase-T 10 Gigabit Ethernet IEEE 802.3
- 155 Mbit ATM
- 1.2 Gbit ATM
- future Cat 6A and Class EA applications

Performance

With guaranteed performance to 500MHz, Nexans LANmark-6A cables exceed the requirements of the International, European and American cable standards, including ISO/IEC 11801, IEC 61156-5, EN 50173, EN 50288 and TIA/EIA 568-C.2.

When used in combination with Nexans LANmark-6A Evo connectors and LANmark-6A Ultim patch cords, the system supports the 10GBase-T applications as defined in IEEE 802.3an and meets or exceeds the link and channel requirements for Category 6A and Class EA as defined in TIA/EIA 568-C.2 and ISO/IEC 11801.

Installation

The LANmark-6A cables have the advantage of offering equal dimensions and flexibility as the equivalent LANmark-6 screened cables with the same ease of installation and termination.

To support the correct set-up of hand held analysers for installation testing, the actual cable NVP value is given in the cable's print legend.

Guarantees

Traceability codes on both cable and packaging ensure quality validation of the installed cable.

Installations with LANmark-6A cable and connectivity are qualified for a 25 year full system warranty, which includes Parts, Channel Performance, Application Support and Labour, as described in the Nexans Certified System Warranty.

LANmark-7A Cable

Contact

Enquiries
Phone: +32 2 3633 800
datanetworks.info@nexans.com

- High Quality Data Cables for simultaneous use with POE+ and POE++
- All Cable exceed Category 7A in terms of ACR and Frequency Range
- Superior Performance with positive ACR over the full frequency range
- Optimised for use with LANmark-7A GG45 connector
- Easy to install with GG45 connectivity through special foil construction

DESCRIPTION

Description

LANmark-7A are 4 pair S/FTP cables with individual pair foils and an overall braid offering upper frequencies of at least 1250MHz but up to 1600MHz. All cables are fully compliant with Category 7A standard and offer even large headroom above the Cat 7A requirement. Due to this excellent electrical performance and positive ACR all cables supports applications beyond 10GBASE-T, including 25GBASE-T.

Application

LANmark-7A is the highest performing standardised cabling solution in the enterprise market and will support all current data applications and all planned applications using cabling up to Class FA.

- All Ethernet applications including
- 10/100/1000Base-T
- 1000Base-TX
- 10GBase-T
- 25GBase-T up to 30m
- POE, POE+, POE++ (Draft)
- Cable sharing applications including CATV up to 862MHz
- Any future Class FA application

Installation

Ease of Installation is one of the main features of the LANmark-7A cable. Extra attention has been paid to ensure that the screen coverage is maintained and foils do not open during installation. The cable has been specially designed to be used in conjunction with the LANmark-7A GG45 12C connector.

To support the correct set-up of hand held analysers for installation testing, the actual cable NVP value is given in the cable's print legend.

- Category 6 Snap-In connector
- Available in unshielded and shielded version
- Fast and easy termination without punch down tool
- Wiring according to colour code T568B or T568A
- Reterminable
- Stranded version available for consolidation points
- Supports POE Plus applications (15 Watts per pair)
- An adapter can be added to fit the keystone format

DESCRIPTION

Application

Nexans LANmark-6 Evo Snap-In connectors are manufactured and tested to the latest Category 6 specifications defined in the International and American cabling standards and are designed to meet or exceed the quality and performance criteria needed to support all applications up to 250 MHz.

- 10 BASE-T Ethernet
- 100 BASE-T Fast Ethernet
- 1000 BASE-T Gigabit Ethernet
- 155 Mb ATM
- 622 Mb ATM
- 1.2 Gb ATM
- POE Plus (including IEC 60512-9-3 and IEC 60512-99-001)
- Future Class E applications

Design

Nexans LANmark-6 Evo Snap-In connectors are designed to match with LANmark-6 cable and patch cords and to complement all LANmark modular components, such as:

- Snap-In patch panels (fixed, sliding and angled) and Zone Distribution Boxes
- Snap-In outlet modules (UK, US, European and German style)

Performance

Nexans LANmark-6 Evo Snap-In connectors meet or exceed the requirements for Category 6 connecting hardware as described in ISO/IEC 11801, IEC 60603-7 and EIA/TIA 568-C.2.

Installation

The wire organiser guarantees fast and easy termination of the LANmark-6 Evo Snap-In connector without the need for a punchdown tool. An optional comfort tool (N420.567) can be used to increase the ease of installation. A stranded version is available for CP to TO links.

Guarantees

The LANmark-6 Evo Snap-In performance is guaranteed to meet or exceed the requirements of the above mentioned standards.

- High bandwidth RJ45 connector supporting 10 Gigabit Ethernet
- Fully compliant with TIA and ISO Category 6A cabling and connector standards
- Supports very short Category 6A channel configurations, often required in Data Centres
- 360° shielding offering full Alien Crosstalk immunity
- Fast and easy termination without punch down tool
- Wiring according to colour code T568B or T568A
- Reterminable
- Stranded version available for CP to TO links
- Supports PoE++ Type 4 applications delivering up to 90W/71W (IEEE 802.3bt)
- An adapter can be added to fit the keystone format

DESCRIPTION

Application

Nexans LANmark-6A Evo Snap-In Connectors are manufactured and tested to the latest Category 6A specifications defined in the International and American cabling standards and are designed to meet or exceed the stringent quality and performance criteria needed to support all applications up to 500 MHz, including 10 Gigabit Ethernet.

A fully closed metal rear cover providing 360 degrees shielding offers excellent coupling attenuation and ensures immunity from Alien Crosstalk and other external interferences.

Channels built with LANmark-6A cables and jacks do not need on site testing for Alien Crosstalk, as this parameter is met by design. This significantly reduces the installation cost for 10G network cabling.

- 10 BASE-T Ethernet
- 100 BASE-T Fast Ethernet
- 1000 BASE-T Gigabit Ethernet
- 10G BASE-T Gigabit Ethernet IEEE 802.3
- 155 Mbit ATM
- 1.2 Gbit ATM
- PoE++ Type 4 (IEEE 802.3bt) including IEC 60512-9-3/ed.2 (test 9c) and IEC 60512-99-002/ed.1 draft (test 99b)
- Future Cat 6A and Class EA applications

Design

Nexans LANmark-6A Evo Snap-In connectors are designed to match with LANmark-6A cable and patch cords and to complement all LANmark modular components, such as:

- Snap-In patch panels (fixed, sliding and angled) and Zone Distribution Boxes
- Snap-In outlet modules (UK, US, European and German style)

Nexans LANmark-6A Evo connectors meet or exceed the requirements for Category 6A connecting hardware as described in ISO/IEC 11801, IEC 60603-7-51 and EIA/TIA 568-C.2.

In conjunction with LANmark-6A cable they support all 2, 3 and 4 connector models as specified in these standards, as well as very short link and channel configurations which are increasingly required in Data Centre environments.

Installation

The wire organiser guarantees fast and easy termination of the LANmark-6A Evo Snap-In connector without the need for a punchdown tool. An optional comfort tool (N420.567) can be used to increase the ease of installation.

A stranded version is available for CP to TO links.

Guarantees

The LANmark-6A Evo Snap-In performance is guaranteed to meet or exceed the requirements of the above mentioned standards.

Traceability codes on both connector and packaging ensure quality validation.

Installations with LANmark-6A cable and connectivity are qualified for a 25 year full system warranty, which includes Parts, Installation, Channel Performance and Application Support, as described in the Nexans Certified System Warranty.

LANmark-6A Field Terminable Plug

Contact

Enquiries
Phone: +32 2 3633 800
datanetworks.info@nexans.com

- Field installable Cat 6A plug for MPTL connections
- For solid wire cable AWG24-AWG23
- Accepts cable diameters from 6.0 to 8.5mm
- 360° shielding offering Alien Crosstalk immunity
- Easy termination without special tools
- Wiring according to colour code T568B
- Supports all Class EA applications
- Supports PoE applications

DESCRIPTION

Application

Nexans LANmark-6A Field Terminable Plug is designed to build Modular Plug Terminated Links (MPTL) as specified in the TIA 568-2.D standard.

In conjunction with LANmark-6A infrastructure cable and the LANmark-6A Snap-In connector configured in MPT links, the plug will support all Class EA applications, including 10GBase-T and Power over Ethernet up to 100W.

MPTL are increasingly being used for direct data connections between patch panels and network devices, such as Wireless Access Points and IP Cameras, which are usually located in or near the ceiling void and often powered over the network via PoE.

Design

The plug is fully shielded, offering excellent coupling attenuation and immunity from Alien Crosstalk and other external interferences.

The plastic snap-on boot with reinforced strain relief and closing nut has an integrated latch protector.

Performance

The LANmark-6A Field Terminable Plug meets or exceeds the requirements for Category 6A connecting hardware as described in ISO/IEC 11801, IEC 60603-7-51 and TIA 568.2-D. In conjunction with LANmark-6A cable, the plug supports MPTL configurations as specified in TIA 568.2-D.

Installation

The wire organiser ensures easy mounting of the LANmark-6A Field Terminable Plug without the need for a special termination tool, apart from a pair of parallel jaw pliers.

Detailed installation instructions are available on-line and are supplied with every box of 24 plugs.

Guarantees

Installations with LANmark-6A cable and connectivity including the LANmark-6A Field Terminable Plug can qualify for a 25 year full system warranty, which includes Parts, Installation, Channel Performance and Application Support, as described in the Nexans Certified System Warranty.

LANmark-7A/-8 GG45

- RJ45-compatible Cat 7A/Cat 8 connector using Nexans unique GG45 interface
- Specified up to 2 GHz
- Able to support applications beyond 10G, including 25GBase-T and 40GBase-T
- Cat7A / Class FA Channel compliance with Cat 7A Cable
- Cat 8 / Class I / II Channel compliance with Cat 8 Cable
- Supports PoE++ Type 4 applications delivering up to 90W/71W (IEEE 802.3bt)
- 360° shielding offering Alien Crosstalk immunity
- Version for solid wire from 22 to 24 AWG (N420.735)
- Version for stranded wire from 24 to 26 AWG (N420.736)
- Fits all Nexans LANmark Snap-In panels and mounting hardware
- An adapter can be added to fit the keystone format

DESCRIPTION

Design and application

Nexans LANmark GG45 is a screened RJ45-compatible jack specified up to 2000 MHz and specifically designed to support the high frequencies required for applications beyond 10 Gigabit Ethernet.

- Combined with LANmark-7A cable, the GG45 connector supports 25GBase-T applications. (*)
- Combined with LANmark-8 cable, the GG45 connector supports 40GBase-T applications. (*)

(*) over 30m Channel lengths.

The LANmark GG45 connector features 12 contacts: 8 contacts for the 2000 MHz transmission (GG-mode) and 4 additional contacts to ensure RJ45 compatibility (RJ Mode).

An overall die-cast housing and a fully closed metal rear cover, providing 360 degrees shielding, offer excellent coupling attenuation and immunity to Alien Crosstalk and other external interferences.

LANmark GG45 connectivity, in conjunction with LANmark-7A cable, fully complies with the requirements for Category 7A / Class FA Channels as specified in ISO/IEC 11801 and EN 50173-1. In conjunction with LANmark-8 cable, the requirements for Class I/II Channels over max. 30m distance are met, as described in ISO 11801.

As such, LANmark-7A/8 Channels support all applications up to 1000 MHz and 2000 MHz respectively, providing at the same time backward compatibility with lower speed applications:

LANmark-7A

STANDARDS

International EN 50173-1;
IEC 60603-7-71 ;
IEEE 802.3af (PoE);
IEEE 802.3bt (PoE++);
IEEE 802.3at (PoE+); ISO/
IEC 11801

- 10Base-T Ethernet
- 100Base-TX Fast Ethernet
- 1000Base-TX Gigabit Ethernet
- 10GBase-T 10 Gigabit Ethernet IEEE 802.3
- 25GBase-T 25 Gigabit Ethernet IEEE 802.3bq
- 40GBase-T 40 Gigabit Ethernet IEEE 802.3bq
- 155 Mbit ATM
- 1.2 Gbit ATM
- POE Plus IEEE802.3at
- POE Plus IEEE802.3bt
- CATV up to 862MHz
- all future Cat 6A and Class EA applications
- all future Cat 7 and Class F applications
- all future Cat 7A and Class FA applications
- all future Cat 8 and Class I / II applications

Performance

LANmark GG45 meets the stringent requirements of Category 7A up to 1000 MHz and Category 8 up to 2000 MHz. The connector engine features a metal cross to keep the 4 pairs separated from each other, ensuring a significant reduction of internal and external crosstalk (NEXT/FEXT, Power Sum NEXT/FEXT and Alien Crosstalk) and optimising Signal to Noise Ratios.

Installation

The wire organiser which is specifically designed for terminating the GG45 connector allows for a smooth and reliable wiring. In addition, using the Nexans patented Easy Termination Tool (N422.117) ensures adequate and swift preparation of the shielded pairs of the cable and fool-proof installation.

The LANmark GG45 connector fits all structural hardware designed for LANmark Snap-In connectors and can be used in all positions of a 4 connector Channel (Patch Panel, Cross Connect, Consolidation Point, Outlet).

For CP and CC configurations the GG45 version for stranded wire cable (N420.736) should be used.

Guarantees

Channels built with LANmark GG45 connectivity and LANmark-7A or LANmark-8 cable qualify for a Class FA or Class I/II System warranty respectively, for a period of 25 years, including parts, installation, channel performance and application support.

For a Warranty certificate to be issued, the Warranty application process must be followed.

Traceability codes on both connector and packaging ensure quality validation.

Modular Patch Panels for Snap-In Connectors

Contact
Enquiries
Phone: +32 2 3633 800
datanetworks.info@nexans.com

- Compatible with all Snap-In connectors
- 24 ports
- Sliding and Fixed versions available
- Clip-On mechanism
- Exclusive Auto-Connect Earthing system
- Universal design supporting Unscreened and Screened connectors
- Shuttered versions available

DESCRIPTION

Nexans Snap-In range of patch panels are designed to accommodate any of the Snap-In connectors in the LANmark product family (LANmark-7A, LANmark-6A, LANmark-6, and LANmark-5).

The Snap-In panels feature an exclusive Clip-On system to secure the connector in the panel and to provide a simple means of earthing shielded connectors to facilitate installation. Connection of the panel to earth is achieved with a unique Auto-Connect feature removing the need for individual bonding conductors.

The panels are Nexans branded and have a series of complementary cable management products such as blank panels and patch cord guides.

The patch panels are designed for standard 19" enclosures, are 1U high, and support the following common features:

- 24 Ports with shutters
- Designed for Screened and Unscreened Snap-In connectors
- Compatible with all performance categories of connector
- Clip-On mechanism for simple earthing
- Exclusive rear cable management facilities
- Robust construction

Nexans offers three main panel versions:

- Angled Panels or Panels with angled Connectors to support high density environments
- Sliding Panels to allow quick installation and easy maintenance which feature a flexible label for port numbering
- Fixed Panels using screen printed numbering systems for labelling

Modular Patch Panels for Keystone Connectors

Contact
Enquiries
Phone: +32 2 3633 800
datanetworks.info@nexans.com

- Compatible with Essential and LANmark keystone connectors
- 24 ports on 1U
- Tie-wrap strain relief
- Earthing and grounding features
- Black finish

DESCRIPTION

Application

Nexans modular patch panels for keystone connectors are based on 19" frame dimensions and can accommodate up to 24 keystone connectors on 1U.

Note: LANmark Snap-In connectors need to be equipped with keystone clip (N429.625 or N429.626) to fit into Keystone Panels series.

Design

The patch panels are designed to accommodate 24 keystone connectors.

The metalwork at the back of the panel is made of unpainted steel to enable the necessary earthing and bonding when using shielded cable and connectors. The painted front plate allows a neat flush mounting of the connectors.

The panels have screen-printed numbering 1-24 above the ports and a labelling field at the right end for patch panel numbering or identification.

Installation

The Nexans keystone connectors can easily be latched in place without the need for any tool. They are also easy to remove from the panel, when necessary.

The panels feature rear cable management for tie-wraps to ensure cable retention and strain relief and are supplied with fixings.

datanetworks.info@nexans.com

- Patch guides to manage and store all patch cords.
- 1 HU and 2 HU for high density.
- 1 HU with rings for easy access.
- Cable guide for all patch panels without clip-on.

DESCRIPTION

For a correctly managed installation, Nexans offers a full range of cable management accessories to complement our patch panel and cabinet range. The range is suitable for all Nexans Copper and Optical patch panels.

The new offering is Nexans branded to blend with other Nexans products used in a cabinet.

The cable management range is designed for all 19" cabinets. The range includes patch guides and cable guides.

Patch Guides

The Nexans patch guide range enables orderly patch cord storage. All the Nexans accessories are guaranteed to maintain the required bending radius for patch cords which in turn ensures superior data transmission for the installation. The paint finished metal accessories provide improved stability over plastic guides on the market.

The 1HU and 2HU universal patch guides are delivered with a front plate. The 8 cm depth provides for the bending radius and enough storage space for the patch cords. Two openings designed at the rear face improve the storage and entry possibilities for patch cords.

An alternative 1 HU 5- ring metal patch guide is offered. This accessory similarly allows for orderly patch cord management in any installation.

Cable Guide

The Nexans cable guide offers fast and reliable cable retention and grounding. The clip-on system is a proprietary Nexans design and improves the flexibility, solidity and the grounding of your installation.

STANDARDS

International ISO/IEC 11801

datanetworks.info@nexans.com

- High speed RJ45 patch cord to run 10GBase-T and future Cat6A applications
- High Density support : 48 cords on 1 height unit
- Frequency range up to 500MHz, fully complies to Cat 6A TIA568C.2 and ISO11801
- Individually screened pairs for reduced Internal Crosstalk and Alien Crosstalk immunity
- Externally certified
- Retrofit Latch Protector available in 8 colours for colour coding

DESCRIPTION

Application

LANmark-6A Ultim cords are developed to support 10 Gigabit Ethernet (IEEE 802.3an) and any other future Cat.6A application.

LANmark-6A Ultim Cords offer superior performance up to 500MHz and are matched with other LANmark-6A components to provide improved data throughput in complex channel configurations. Ultim cords use stranded cable and as such provide maximum system flexibility for the use at Cross Connects and Consolidation points.

They will also maximise the lifetime and longevity of the system by minimising the risk of wear & tear damage. Due to their good electrical performance and mechanical stability, LANmark-6A Ultim cords can be used for accurate field testing of Cat 6A cabling channels. .

Ultim Cords feature a slim boot for mechanical protection, which is kept inside the RJ45 boundaries to enable High Density Patching with 48 cords in 1 height unit.

They also come with a 'Replaceable' Latch Protector, which can be used for colour coding of different services.

Performance

The LANmark-6A Ultim cords fully comply and exceed the requirements of EIA/TIA-568-C.2 and ISO11801 and enable to achieve high performing Cat 6A channels. Used with other LANmark-6A components, very short Cat 6A link and channel configurations with up to 3 connection points within 10 meters can be supported.

Guarantees

When installed in combination with other LANmark-6A components, a 25 years channel warranty can be obtained, covering full 10GBase-T support and full Cat 6A/ Class EA compliance.

Usage

- The cords are by design fully Alien Crosstalk compliant, so no special installation rules need to be taken into account for ANEXT and AFEXT compliance.
- 1, 2, 3, 5, 10, 20m are standard lengths available from stock, other lengths are available on demand.
- Orange and Dark Grey are standard colours available from stock; other colours are available on demand.
- Default Plug Configuration is a black boot with a preinstalled black latch protector.

datanetworks.info@nexans.com

- Complies fully with Category 6 standards
- Uses Nexans cable technology
- Fully matched with other components for maximum performance
- LSZH Flame retardant jacket
- Retrofit Latch Protector available in 8 colours for colour coding

DESCRIPTION

Application

LANmark-6 Patch Cords can be used to deliver a full end-to-end Class E solution.

They provide improved data throughput and allow for the inclusion of a cross-connect or Consolidation Points for maximum system flexibility. They will also maximise the lifetime and long term performance of the system by minimising the risk of wear & tear damage which can be caused by using non-matched cords. .

LANmark-6 Cords feature a slim over-moulded boot which is kept inside the RJ45 boundaries to enable High Density Patching with 48 cords in 1 height unit. They also come with a Retrofit Latch Protector, which can be used for colour coding of different services.

Guarantees

When installed in combination with other LANmark-6 components, a 25 years channel warranty can be obtained, covering full Cat 6/Class E compliance.

Installation

- Small cross section allows neat installation and simplifies the creation of bundles in cabinets.
- A Low Smoke Zero Halogen - Flame Retardant jacket is standard.
- 1, 2, 3, 5, 10 and 20m are standard lengths; other lengths are available on demand.
- Orange and Dark Grey are standard colours available from stock; other colours are available on demand.
- Default Plug configuration is a black boot with a preinstalled black latch protector; other combinations available on request.

LANmark-7A GG45 Patchcords

- High bandwidth patch cord for 25 Gigabit applications and beyond
- Runs the GG45 '2in1' Connector in its high speed GG-Mode
- Use GG45 8 Contact Plugs according IEC61076-3-110
- Allow full 4-connector Class FA channels
- Compatible with High Density requirements in Data Centres

DESCRIPTION

Description

Nexans LANmark-7A patch cords with GG45 8C non-switched plugs enable a GG45 7A permanent link to be used in 1000 MHz mode. The protruding part on the plug activates the switch within the GG45 7A "2in1" jack and terminates the none used contacts of RJ45 to ground. Using the contacts in the extreme outer corners of the GG45 interface for transmission, excellent NEXT and Return Loss performances are achieved.

Nexans LANmark-7A patch cords maximise the full performance of the channel and will exceed the requirements of the ISO 4 connector model. This provides improved data throughput up to 1000 MHz and allows for the inclusion of additional patching or Consolidation Points for maximum system flexibility and all future data applications according ISO 11801.

- High Speed patch cords
- Individually screened pairs in cable and plug
- High Speed Plug with Look and Feel of a RJ45 plug (just using different contact positions)
- 2 x GG45 8C 4-pair or GG45 8C to RJ45 (Conversion Cords)
- Orange color, different colors available on request

Guarantees

- Reliable connections over the lifetime of the cabling system.
- Compatible with IEC 61076-3-110
- Compatible with Class F and Class FA standards (ISO 11801:2008)

Installation

- Self-latching, high reliability GG45 (IEC61076-3-110) screened connectors
- Sidebars on the plug avoid errors by using the patch cord for RJ45 jacks
- Low Smoke Halogen Free - Flame Retardant cable jacket
- 1, 2, 3 and 5m lengths on stock ,others lengths available on request
- 10m and 20m offered for consolidation points (cut to length)

LANmark-6A Slimflex Uniboot Patch Cords

Contact
Enquiries
Phone: +32 2 3633 800
datanetworks.info@nexans.com

- Small diameter cords offering significant space-saving and flexibility
- Particularly suitable for high density patching areas including data centres
- Individually screened pairs for reduced Internal Crosstalk and Alien Crosstalk immunity
- Full Class EA Channel compliance up to 96m length including 2 x 3m cords
- White LSZH jacket
- Slim boot design with black latch protector
- Latch Protector available in 7 other colours allowing differentiation between applications

DESCRIPTION

Application

LANmark-6A Slimflex cords are designed to support 10 Gigabit Ethernet and other Class EA applications in high density environments. They are specified to 500MHz and are matched with LANmark-6A cable and connectors to provide full Class EA Channel configurations.

Due to their thin AWG30 stranded conductors and small outer diameter of only 4.5mm Slimflex cords offer increased flexibility and can save up to 44% space compared to regular Category 6A patch cords.

Equipped with a slim but robust boot with long latch protector, Slimflex cords support high density patching whilst facilitating easy cord removal. The prefitted black latch protector is removable and can be replaced with a coloured version, allowing colour coding of different services or applications.

Performance

LANmark-6A Slimflex cords, in conjunction with LANmark-6A cable and connectors, support all Class EA Channel configurations, as specified in TIA-568.2-D and ISO 11801, up to a total channel length of 96m, with 90m horizontal cable and max. 3m cords at either end.

Longer lengths of Slimflex cords can be supported, if the horizontal cable length is reduced according to an insertion loss ratio of 2.5, with a maximum combined length of 15m Slimflex cords.

Guarantees

When installed in combination with LANmark-6A cable and connectors, a 25 years Channel warranty can be obtained, covering full 10GBase-T support and Class EA compliance.

Usage

- Outer jacket is LSZH, standard colour is White. Other colours are available on request.
- Standard lengths are 1, 2, 3 and 5m. Other lengths are available on request.
- Up to 3m Slimflex cords at either end will support full Class EA Channel performance. Up to 15m combined length of Slimflex cords can be supported in Channel configurations when reducing the horizontal cable length according to a 2.5 derating factor. Details on supported length configurations can be found in our LANmark-6A Design Guidelines.

- Small diameter cords offering significant space-saving and flexibility
- Particularly suitable for high density patching areas
- Unscreened flexible AWG28 twisted pair cable
- White LSZH jacket
- Slim boot design with black latch protector
- Latch protector available in 7 other colours, for differentiation between applications

DESCRIPTION

Design and Application

LANmark-6 Slimflex UniBoot cords are designed to offer a reduced sized patching solution, whilst fully supporting Gigabit Ethernet or any other Category 6 / Class E application.

The cable is built with AWG28 stranded copper conductors and has an overall diameter of only 4 mm, as opposed to traditional Category 6 cords which have a typical width of around 6 mm.

As a result, Slimflex cords can reduce bundle sizes with 53% compared with traditional cordage. This is particularly useful in high density patching areas in telecommunications rooms, where space-saving and ease of cord management are crucial.

The stranded wire design offers also greater flexibility compared to solid wire equivalents. This combination of reduced size and increased flexibility makes the LANmark Slimflex UniBoot cords the ideal solution both for easier cabinet and rack management, and for day-to-day use in the work area.

LANmark-6 Slimflex cords feature a slim over-moulded boot with bend relief and a pre-fitted black latch protector which can be replaced with a different colour, useful for colour coding of different services. (7 additional colours available - part number series N110.LPx)

Guarantees

When installed in combination with other LANmark-6 components, a 25 years channel warranty can be obtained, covering full Category 6 / Class E compliance.

Usage

- Available lengths are 0.5m, 1m, 2m, 3m and 5m.
- Standard jacket is LSZH in White colour.

Nexans offers a complete set of European/French style mounting hardware for the use of LANmark Snap-In connectivity in the work area.

DESCRIPTION

LANmark Snap-In Modules in standard European/French style

45 x 45 mm angled and flat shuttered modules for 2 LANmark Snap-In connectors.

Covering Frames

Flush mount design to fit both the angled and flat 45 x 45 mm LANmark Snap-In Modules.

Surface Mount Boxes

Designed to fit both the angled and flat 45 x 45 mm LANmark Snap-In Modules.

UK Mounting Hardware for LANmark

Contact

Enquiries

Phone: +32 2 3633 800

datanetworks.info@nexans.com

Nexans offers a complete set of UK style mounting hardware for the use of LANmark Snap-In connectivity in the work area.

DESCRIPTION

LANmark Snap-In Modules in standard UK styles

- 25 x 50 mm angled and flat shuttered modules for 1 LANmark Snap-In connector
- LJ6C angled and flat shuttered modules for 1 LANmark Snap-In connector
- 50 x 50 mm angled shuttered modules for 2 LANmark Snap-In connectors

Single and Double gang Frames

Various designs of frames to fit the 25 x 50 mm or 50 x 50 mm LANmark Snap-In Modules.

Blank Modules

To cover unused space in single or double gang frames e.g. when only 1 or 3 ports are required.

Single and Double gang Back Boxes

Suitable with the single and double gang frames.

LANmark Pre-Term Units

Contact

Enquiries
Phone: +32 2 3633 800
datanetworks.info@nexans.com

- Pre-connectorised Jack-Jack, Jack-Plug or Plug-Plug assemblies
- 4 pair single units
- Categories 6, 6A or 7A
- Repeatable and stable performance level
- Various reaction-to-fire performance levels according to CPR (h/EN50575:2014 +A1:2016)

DESCRIPTION

Design

LANmark Pre-Term Units are 4 pair cable assemblies pre-connectorised with either Jack-Jack, Jack-Plug or Plug-Plug. The jacks are LANmark Snap-In connectors, compatible with all LANmark Snap-In patch panels, zone distribution boxes and outlet modules. Shielded constructions offer immunity to external noise and comply with Alien Crosstalk requirements by design.

Each Pre-Term unit is numbered to allow identification. Labelling can be customised.

Application

Pre-Terminated assemblies are well-suited for areas where installation time is limited, as cable preparation and connector termination on-site is eliminated.

Performance

Pre-Terminated units are available in Cat 6/Class E, Cat 6A/Class EA and Cat 7A/Class FA performance and meet or exceed the requirements for the given Category/Class as specified in the International, European and American standards. When used in conjunction with other LANmark components of the same Category, all 3- and 4-connector Link and Channel configurations, as specified in the mentioned standards, are supported.

Installation

Nexans LANmark Pre-Term units contribute in reducing installation time, since cable preparation and connectorisation on-site is eliminated. Field testing is still required after installation to obtain the Nexans LANmark System Warranty.

Note: the units are suitable for laying, not for pulling.

Guarantees

All Pre-Term units are factory tested. An electronic format report can be delivered on request. Traceability codes ensure quality validation.

Installations with LANmark Pre-Term units in combination with other LANmark components of at least the same Category qualify for a LANmark Certified System Warranty for a period of 25 years, including parts, installation, Channel performance and application support.

LANmark Pre-Term Bundles

Contact

Enquiries
Phone: +32 2 3633 800
datanetworks.info@nexans.com

- Ideal assemblies for high density cabling and data centers
- Pre-connectorised bundles in Jack-Jack, Jack-Plug and Plug-Plug configurations
- Bundles of 6, 12 and 24 units
- Category 6, 6A and 7A performance levels
- Repeatable and stable level of performance
- Individual units are helically assembled to form a round and stable bundle
- Various reaction-to-fire performance levels according to CPR (h/EN50575:2014 +A1:2016)

DESCRIPTION

Design

LANmark Pre-Term bundles are assemblies of 6, 12 or 24 pre-connectorised units, either in Jack-Jack, Jack-Plug or Plug-Plug configurations. The jacks are LANmark Snap-In connectors, compatible with all LANmark Snap-In patch panels, zone distribution boxes and outlet modules.

The units are helically laid up and assembled to accommodate individual unit movement. They are bundled together with a black zero halogen braided sleeve which maintains the bundle structure and facilitates easy deployment on site.

Each cable in the bundle is numbered at both ends with a Helavia ring to allow easy identification during and after installation. Labelling with traceability code is placed on the first cable to allow quality tracking.

Application

Pre-Term bundles are extremely suitable for areas where fast deployment is key. They allow installing up to 24 cables in one go, without the need for any connector termination on site.

Performance

All assemblies are available in Cat 6/Class E, Cat 6A/Class EA and Cat 7A/Class FA performance and meet or exceed the requirements for the given Category/Class as specified in the International, European and American standards. When used in conjunction with other LANmark components of the same Category, all 3- and 4-connector Link and Channel configurations, as specified in the mentioned standards, are supported.

Installation

Nexans LANmark Pre-Term bundles contribute in reducing installation time. Only one assembly needs to be laid instead of 6, 12 or 24 individual cables and connector termination on-site is eliminated.

Note: the bundles are suitable for laying, not for pulling.

- For use as consolidation point.
- Compatible with all LANmark snap-in connectors.
- 6 or 12 numbered snap-in ports with shutters.
- Easy to install

DESCRIPTION

Designed for use as consolidation points, zone distribution boxes significantly increase the flexibility of desk locations in open office environments. They are particularly useful in offices where frequent relocation of outlets in the work area is required.

Nexans ZD boxes are easy to install on walls, under raised floors or in ceiling voids, due to their multiple mounting features.

They are compatible with all LANmark Snap-In connectors, which can be easily inserted by a simple "one-click" movement.

Coloured Latch Protectors for LANmark UniBoot Patch Cords

Contact
Enquiries
Phone: +32 2 3633 800
datanetworks.info@nexans.com

- Retrofit coloured latch protectors
- Fit all LANmark UniBoot patch cords
- For differentiation between services
- Available in 8 different colours
- Packed in bags of 50

DESCRIPTION

The black latch protectors supplied with LANmark UniBoot Patch Cords are removable and can be replaced with coloured versions.

This can be particularly useful to differentiate between services or applications at the patching side in the cabinet and also at consolidation points or user outlets in the work area.

The latch protectors can be installed or replaced very quickly and easily, without the need for any tools.

They are available in 8 different colours (including black) and are a perfect match for the coloured shutters.

Available colours:

- Yellow
- Orange
- Red
- Green
- Blue
- Dark grey
- Black
- White

several areas of this web site and are used exclusively for technical purposes and/or to trace users' use of the site. You can oppose the recording of cookies by referring to your browser's user manual. You can also delete cookies at any time and individually by referring to your computer's user manual. More information is available at www.AboutCookies.org. Should you want to get any additional information regarding the above topic, please refer to our dedicated section about cookie policy.

PRIVACY

Nexans considers privacy an important issue, so this Privacy Policy outlines the types of personal information we gather when you use one of Nexans web sites and some of the steps we take to safeguard it. These principles apply to personally identifying information we ask for and that you provide. By this we mean information that individually identifies you, such as your name, physical address, e-mail address or other contact details.

DATA COLLECTION

Browsing of our web sites and most other services do not require any personally identifying information. In certain sections of the site, in order to provide you with products or services that may be of interest, you may be invited to provide 'personal' information that identifies you that is to say your first name, last name, e-mail address, or other contact information that you may voluntarily submit to us : job title, function, country, language preference, business phone, mobile phone, fax number, fields of interest, company name, company type, postal address of the company, number of employees.

Visitors of the site can choose not to enter any personal information.

Nexans may collect limited non-personally identifying information your browser makes available whenever you visit a website. This log information includes your Internet Protocol address, browser type, browser language, the date and time of your query and one or more cookies that may uniquely identify your browser. We use this information to better understand user behavior and to further improve our offering. When we require personally identifying information, we will inform you about the types of information we collect and how we use it. We hope this will help you make an informed decision about sharing your personal information with us. It is then up to you to decide if you want to provide the information or not.

Please note that, once you register on the site, your data will be stored as long as your account remains active on the site. However, if Nexans does not witness any activity over a period of 24 months, it gets classified as inactive account and your data will be anonymized.

USE AND DISCLOSURE OF PERSONAL DATA

Data available to Nexans will be used for the purpose of the technical administration of our website, responding to your direct enquiries and may also be used to provide you with additional information related to content viewed online. You will be able to unsubscribe to marketing communications at any stage. All marketing emails will include unsubscribe links or you can request this at any time by emailing the contact below.

INFORMATION SHARING

In certain circumstances, direct contractual partners of Nexans such as outsourced agencies/external partners (e.g. an event organizer acting on behalf of Nexans or any its affiliated companies) may have access to limited information necessary to contact you. At all times we will ensure that contractual partners of Nexans put in place a comparable level of data protection.

Beyond the above, no personal data information will be shared with third parties.

We do not sell or transfer your personally identifying information to other companies or individuals, unless we have your consent. We may share such information in any of the following limited circumstances:

- We have your expressed consent.
- We provide such information to trusted businesses or persons for the sole purpose of processing your request on our behalf in compliance with this Privacy Policy and appropriate confidentiality and security measures.
- We conclude that we are required by law.
- We may store and process personal information collected on our site in any country in which Nexans or our hosting providers maintain facilities. By using our services, you consent to the transfer of your information among these facilities, including those located outside your country.
- We may share aggregated information with others which do not include any personally identifying information.

INFORMATION SECURITY

We take appropriate security measures to protect against unauthorized access to or unauthorized alteration, disclosure or destruction of data. We restrict access to your personally identifying information to Nexans employees who need to know that information in order to fulfill your request or supply our services.

Legal Notice and data protection

RIGHT TO INFORMATION

In accordance with Article 4(7) of the EU General Data Protection Regulation we will be prepared to address any requests made by our users related to their expanded individual rights under the GDPR:

- Right to be forgotten: you may terminate your NEXANS account at any time, in which case we will permanently delete your account and all data associated with it.
- Right to object: you may opt out of inclusion of your data in our data science projects simply by changing the Privacy Setting on your account.
- Right to rectification: you may access and update your Nexans account settings at any time to correct or complete your account information. You may also contact Nexans at contact.privacy@nexans.com any time to access, correct, amend or delete information that we hold about you, as explained in our Privacy Policy.
- Right of access: our privacy policy describes what data we collect and how we use it. If you have specific questions about particular data, you can contact **contact.privacy@nexans.com** for further information at any time.
- Right of portability: we will export your account data to a third party at any time upon your request.

You also have the right to file a complaint with a data protection supervisory authority regarding our processing of your personal data. The responsible party in accordance with Article 4(7) of the EU General Data Protection Regulation can be contacted at contact.privacy@nexans.com or at our postal address at the attention of the "Data Protection Officer".

Links

The external sites linked to the Nexans web sites are developed by people over whom Nexans exercises no control. These other sites may place their own cookies on your computer, collect data or solicit personal information.

Changes to this Policy

Please note this Privacy Policy will change from time to time. Regardless, we will post those changes on this page and, if the changes are significant, we will also provide a more prominent notice. Each version will be noted at the top of the page. Prior versions of this Privacy Policy will be kept in an archive for you to view. This policy has been last updated on May 2018. If you have any additional questions, please feel free to contact us any time.

Applicable Law

Nexans this Legal Notice shall be governed by French Law without regard to its provisions on conflicts of laws.
